SCHOOL TRANSPORT SAFETY PROCEDURE GUIDELINES COVID–19

Following the Italian Government's Safety Guidelines Protocols for school transportation to prevent transmission of the Coronavirus (COVID-19), AOSR, along with our bus companies, put in place safety measures that all families are required to follow.

In order to make transportation as safe as possible, we ask each family with students using the AOSR Bus Service to carefully read these procedures and follow the guidelines.

Subject to public health guidance and risk of COVID-19 transmission, additional measures may be implemented throughout the school year.

PICK-UP AND JOURNEY

- Bus drivers and monitors are provided with a thermal scanner and will check each student's temperature before the student will be permitted to enter the bus. If the temperature results higher then 37.5˚C (99.5˚F), the child will not be allowed to enter the bus and will be sent home with their parent or guardian. If the student is at the bus stop alone the bus driver or monitor will notify the Bus Coordinator who will inform the parent.

- All students must use the hand sanitizer installed at the entrance of each bus before entering and exiting.

- All students must keep physical distancing with the bus driver and assistant.

- Personal protective equipment (PPE) must be worn at all times throughout the journey.

- Students from the same household will be asked to sit together.

FEVER SYMPTOMS ON THE BUS

If the driver or assistant identifies a student with feverish symptoms during the bus ride, he/she will notify the Bus Coordinator who will promptly inform the appropriate administrator and the School Nurse.
